How to Access the Platform

To view the live website, make sure XAMPP is running (Apache + MySQL started), then open your browser and go to:

- Website: http://localhost/real_estate_portal/index.php
- Database (phpMyAdmin): <http://localhost/phpmyadmin>
- GitHub Repository: <https://github.com/AyshaSAkther/real-estate-portal/tree/main>

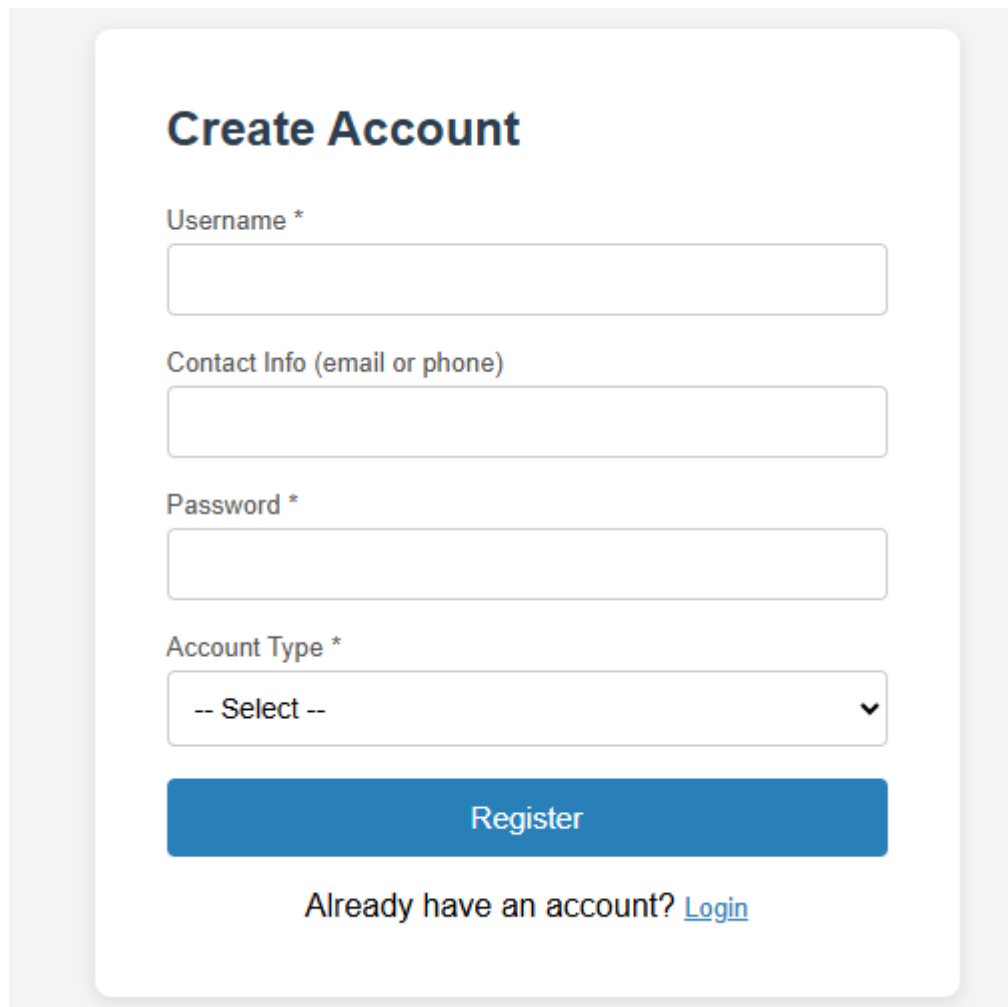

In phpMyAdmin, click on `real_estate_portal_db` on the left sidebar to see all tables, stored procedures, views, and triggers

The homepage running

The homepage of the Real Estate Agency Portal. Users can navigate to browse properties, register a new account, or login. This is the first page that loads when the site is opened.

Register page

The image shows a registration form titled "Create Account" on a light gray background. The form is contained within a white rounded rectangle. It includes four input fields: "Username *" (text), "Contact Info (email or phone)" (text), "Password *" (text), and "Account Type *" (dropdown menu with "-- Select --" and a downward arrow). Below these fields is a blue "Register" button. At the bottom, there is a link that says "Already have an account? [Login](#)".

Register

Already have an account? [Login](#)

The registration page where new users create an account. A username, contact info, password, and role (Agent, Buyer, or Renter) are required. Passwords are securely stored using PHP password hashing.

Login page

A screenshot of a login page. It features a white card with rounded corners on a light gray background. The card has a title 'Login' in bold black text. Below the title are two input fields: 'Username' and 'Password', both with light gray borders. A blue button with the text 'Login' is positioned below the password field. At the bottom of the card, there is a link that says 'No account? [Register here](#)'.

The login page where existing users sign in using their username and password. The system verifies credentials and redirects each user based on their role using PHP session management.

Properties listing page (logged in as agent)/ Dashboard (agent view)

A screenshot of a dashboard for an agent. It has a blue header bar with the text 'Welcome, dizx!' and 'Role: Agent | Contact:'. Below the header is a white card with rounded corners. The card has a title 'My Listings' in bold black text. To the right of the title is a green button with the text '+ Add New'. Below the title, there is a message that says 'You have not added any listings yet.'

The properties browsing page displaying all listings from the database using the PropertyListView. Each card shows the title, type, city, price, status, and a link to view full details.

Add Property

The agent dashboard and Add Property page. Agents can add new listings by filling in property details. This page is restricted — only users logged in as agents can access it.

Dashboard (buyer view) with favorites and inquiries

The property details page showing full listing information. Buyers and renters can send an inquiry message to the agent or save the property to their favorites directly from this page.

phpMyAdmin showing the database tables

The buyer dashboard showing submitted inquiries and saved favorite properties. Data is pulled from the Inquiries and Favorites tables in MySQL and displayed in a clean table format.

phpMyAdmin showing the view, trigger, and stored procedures

phpMyAdmin showing the real_estate_portal_db database. All five tables are visible on the left (Users, Properties, Inquiries, Transactions, Favorites), along with stored procedures and the views folder.
