How to Access the Platform

To view the live website, make sure XAMPP is running (Apache + MySQL started), then open your browser and go to:

- Website: http://localhost/real_estate_portal/index.php
- Database (phpMyAdmin): <http://localhost/phpmyadmin>
- GitHub Repository: <https://github.com/AyshaSAkther/real-estate-portal>

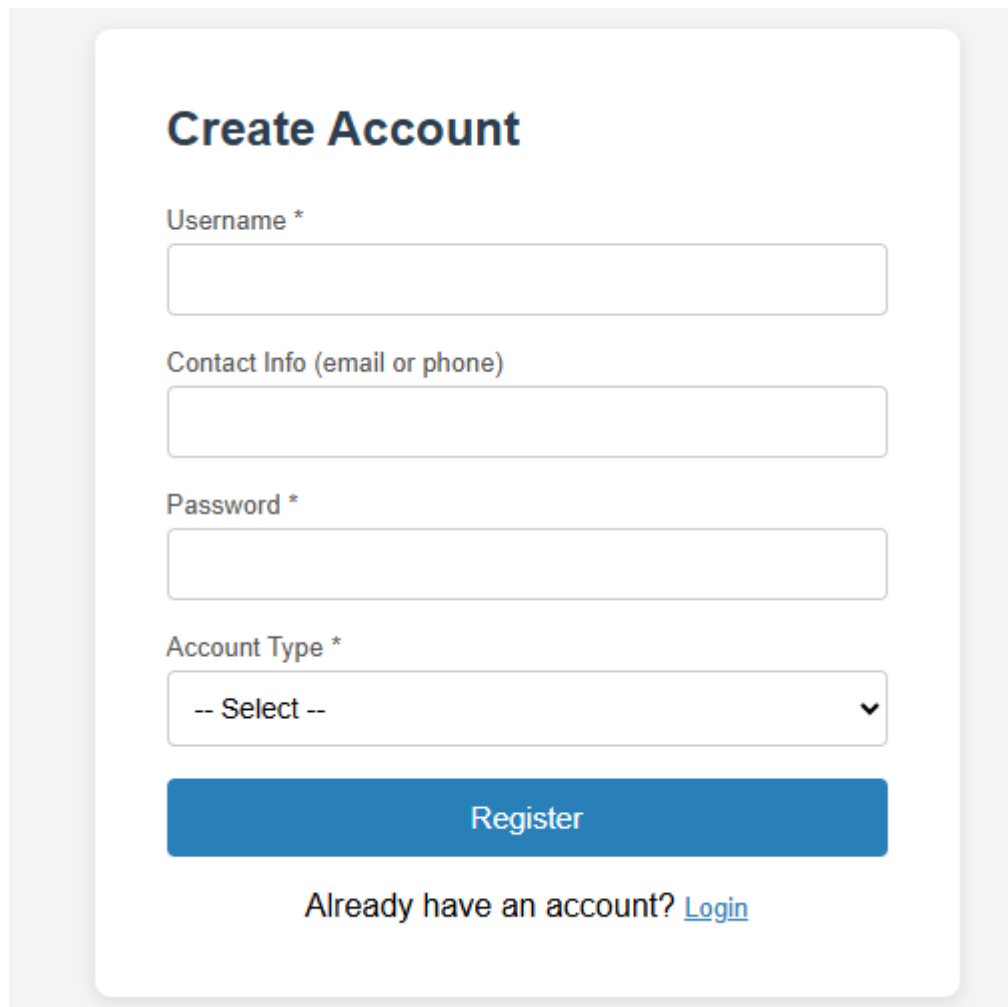

In phpMyAdmin, click on `real_estate_portal_db` on the left sidebar to see all tables, stored procedures, views, and triggers

The homepage running

The homepage of the Real Estate Agency Portal. Users can navigate to browse properties, register a new account, or login. This is the first page that loads when the site is opened.

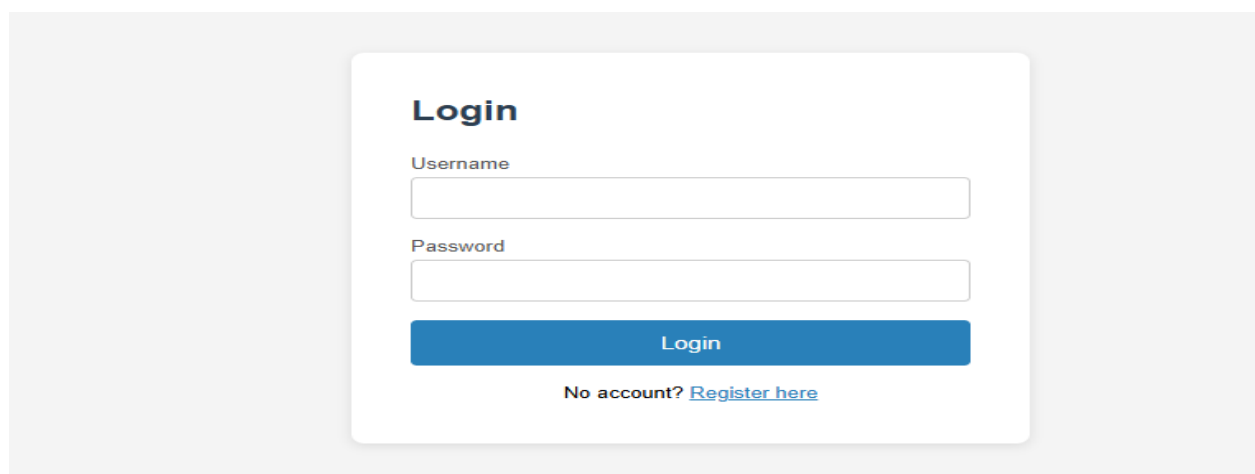

Register page

The registration form is titled "Create Account" in a bold, dark blue font. It contains four input fields: "Username *" (a text box), "Contact Info (email or phone)" (a text box), "Password *" (a text box), and "Account Type *" (a dropdown menu with "-- Select --" and a downward arrow). Below these fields is a large blue button labeled "Register". At the bottom, there is a link that says "Already have an account? [Login](#)".

The registration page where new users create an account. A username, contact info, password, and role (Agent, Buyer, or Renter) are required. Passwords are securely stored using PHP password hashing.

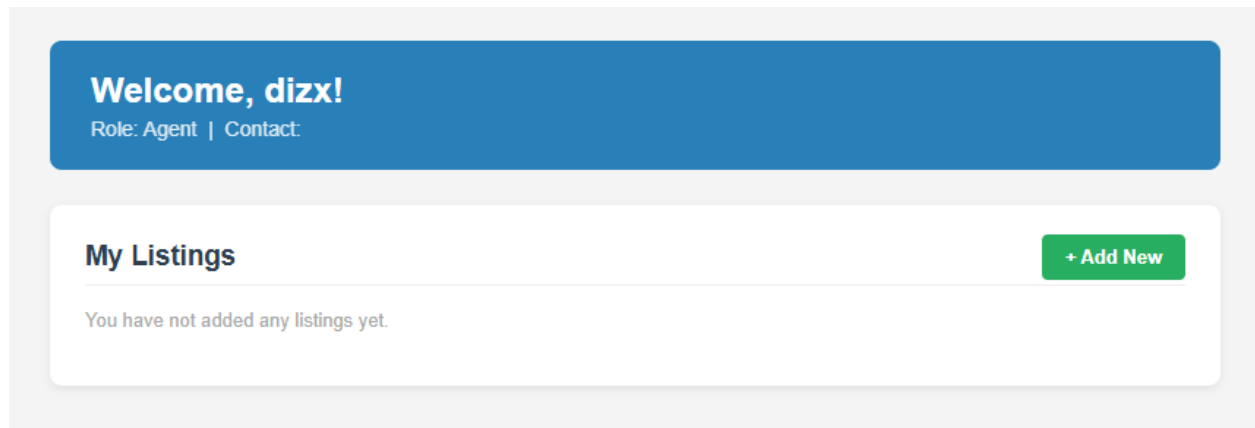

Login page

The login form is titled "Login" in a bold, dark blue font. It contains two input fields: "Username" (a text box) and "Password" (a text box). Below these fields is a large blue button labeled "Login". At the bottom, there is a link that says "No account? [Register here](#)".

The login page where existing users sign in using their username and password. The system verifies credentials and redirects each user based on their role using PHP session management.

Properties listing page (logged in as agent)/ Dashboard (agent view)

The dashboard for an agent, featuring a blue header bar with a welcome message and a 'My Listings' section below it.

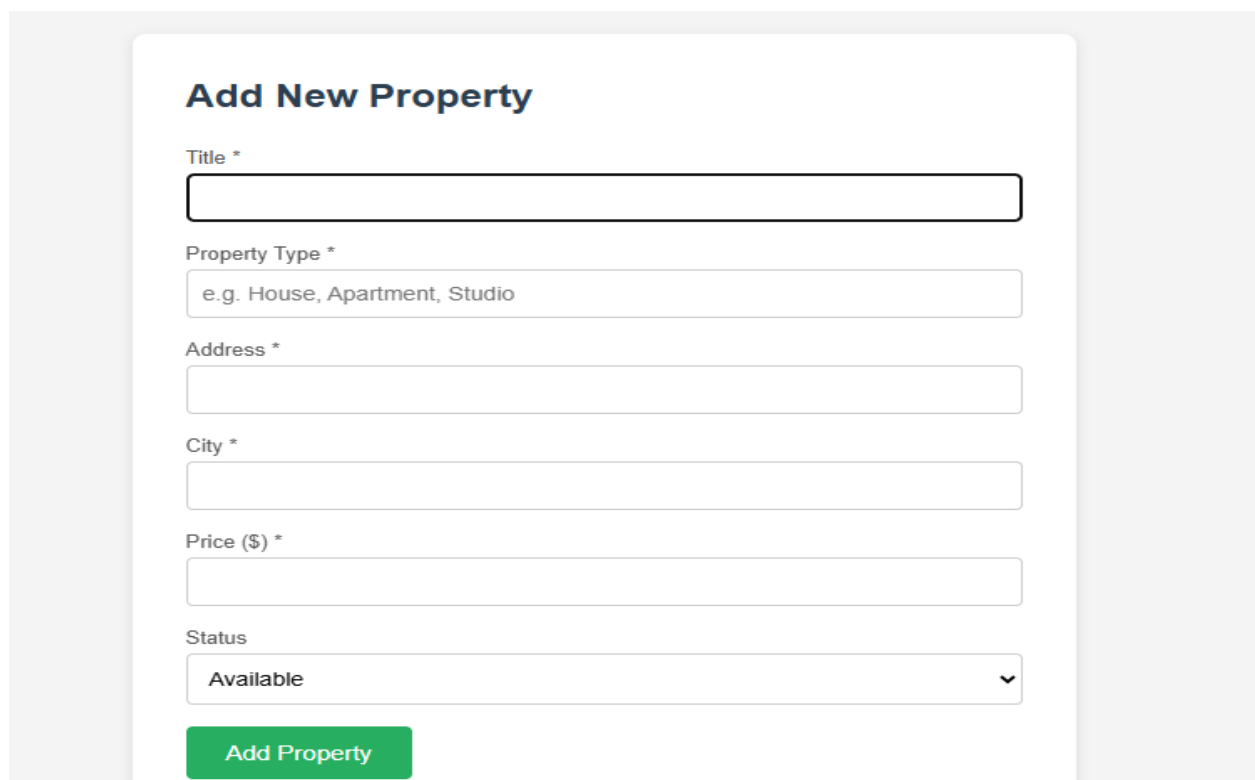

Welcome, dizx!
Role: Agent | Contact:

My Listings [+ Add New](#)

You have not added any listings yet.

The properties browsing page displaying all listings from the database using the PropertyListView. Each card shows the title, type, city, price, status, and a link to view full details.

Property details + inquiry form

The 'Add New Property' form, which includes fields for Title, Property Type, Address, City, Price, and Status, along with an 'Add Property' button.

Add New Property

Title *

Property Type *

Address *

City *

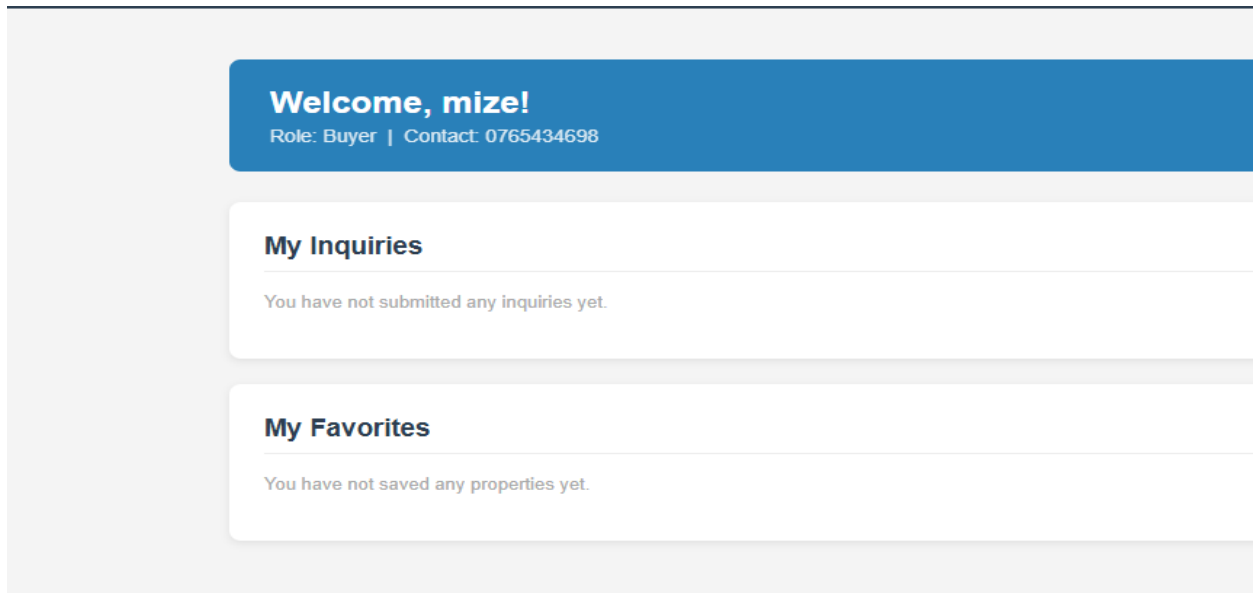

Price (\$) *

Status

[Add Property](#)

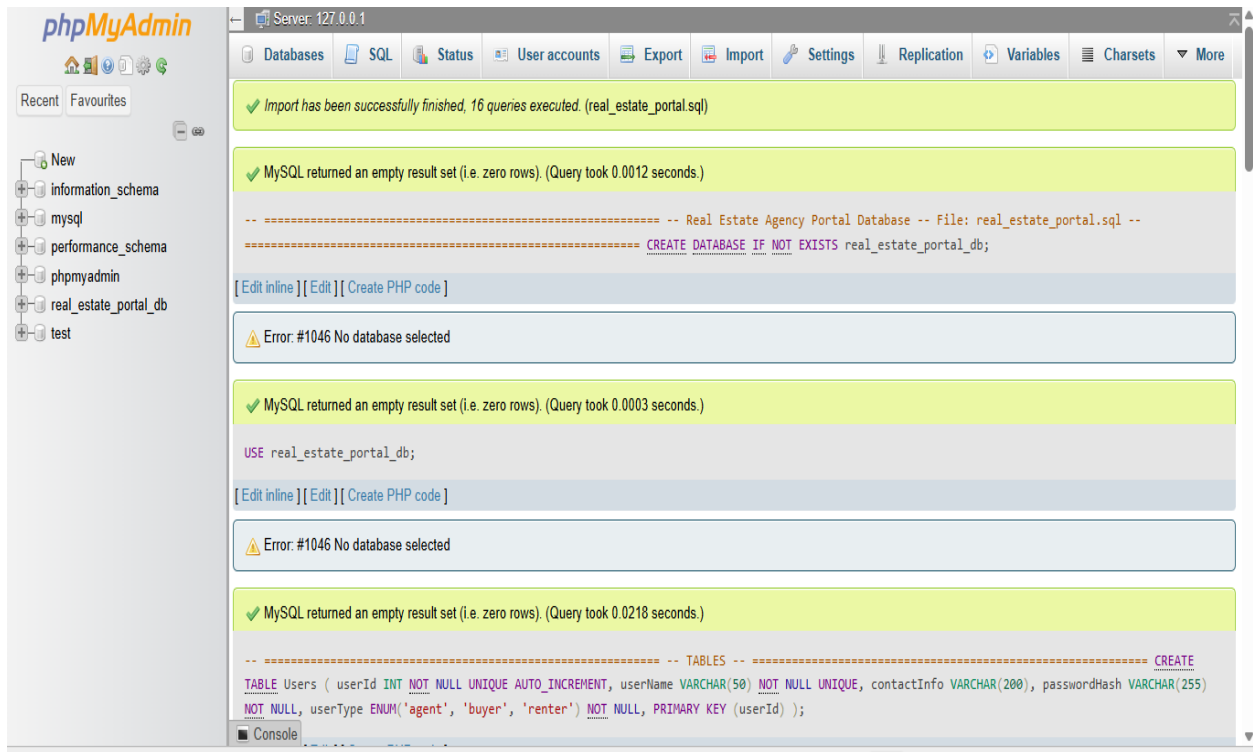

The agent dashboard and Add Property page. Agents can add new listings by filling in property details. This page is restricted — only users logged in as agents can access it.

Dashboard (buyer view) with favorites and inquiries

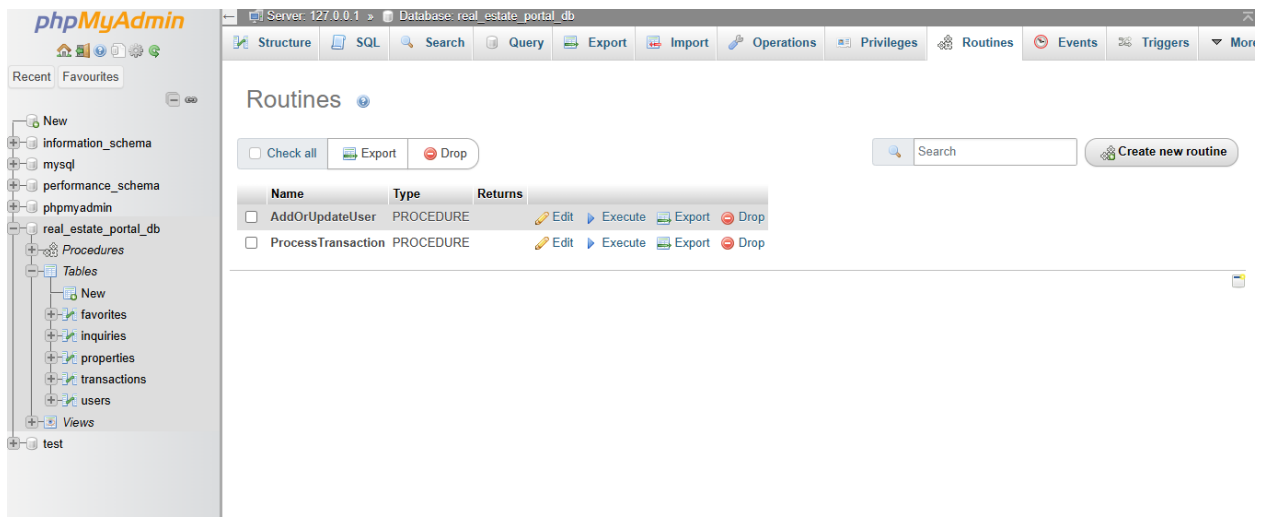

The property details page showing full listing information. Buyers and renters can send an inquiry message to the agent or save the property to their favorites directly from this page.

phpMyAdmin showing the database tables

phpMyAdmin showing the view, trigger, and stored procedures

phpMyAdmin showing the real_estate_portal_db database. All five tables are visible on the left (Users, Properties, Inquiries, Transactions, Favorites), along with stored procedures and the views folder.
